

 **Quad Seal** 

Aluminium Back Channel

It's the Little differences that make a Big difference !

Unique AUSIPOINTS

 **Quad Seal** 
Technology

3 Full Length, Straight Silicone Seals between the back channel and house fascia ensures a watertight seal with no ponding of water along the seal

Full Width Closed Cell Foam Roof Sheet Seal effectively seals ends of roof sheets and wont break down over time as bitumen based tapes do

High Strength, Architectural Grade, Extruded Aluminium with full perimeter powdercoating for great colour coded looks and a long, corrosion free life

2 Full Length, Strengthening Pads provide increased channel rigidity and superior strength where the channel is screwed to the house

Concealed Fixing Channel with Colour Coded Cover Tape, hides rivets and screws for a clutter free view
